ABERDEEN'S GREAT LOSS.

Large Amount of Property Destroyed This Morning.

FIRE WAS OF INCENDIARY ORIGIN.

Last night at 1 o'clock the cry of fire came from Aberdeen, the church bell, schoolhouse bell and whistle of the ferryboat. Laurence, informing the sleeping inhabitants of the two communities that something unusual was happening.

It was soon known that the Martin & Rossenbeld Property was on fire.

With no means for fighting the fire and the unseemly early hour, it was quickly seen that the property was doomed and grave fears felt for the houses surrounding.

Most fiercely did it burn, and the flames were visible over Aberdeen was sufficient to read a newspaper.

It could not be learned accurately what the loss will be, but it is estimated at \$40,000, \$30,000 of which was new stock ready to ship today by boat.

The loss is a severe one to Aberdeen, to say nothing of the owners' loss.

Its ceasing removes the oldest landmark, and it is doubtful if the industry will be rebuilt.

The night watchman, Mr. Botts, has put out thirty-two fires in the twenty years he has served in that capacity.

He is of the opinion that the fire was of an incendiary origin.

DRINK PURE WATER AND ENJOY GOOD HEALTH

The long-continued drought throughout the county has made the question of stock water a serious problem. Many farmers are compelled to haul water for miles, and some of those in the interior who are not fortunate enough to possess good springs or wells come all the way to the Ohio to get enough of the precious fluid to keep their stock alive. What must be the condition of the wells and cisterns in a section where there has practically been no rain all summer? Can what water remains be pure, untainted or fit for household purposes? These are questions that require an answer.

DRINK PURE WATER AND ENJOY GOOD HEALTH.

To have pure water equip your well or cistern with a Bucket Pump and Water Purifier. We sell them. It is the best pump on earth for wells or cisterns. It has no superior for durability or price for wells up to sixty feet. A ten-year-old boy can draw water from ease from a sixty foot well. It will not freeze, as the cups discharge themselves, having stood the test of 88 degrees below zero. It saves its cost in doctor's bills alone in six months.

DRINK PURE WATER AND ENJOY GOOD HEALTH.

For every gallon of water drawn, a gallon of air is circulated through the water, thus ventilating, vitalizing and purifying the water, destroying all germs of disease and removing all impurities from the foulest well or cistern in a few days ordinary use. We also offer and recommend the I. X. Patent Galvanized Steel Chain Pump Curb and Galvanized Steel Tubing.
